

Intel Core 2 DUO E6300 2 x 1.8 Ghz Dedicated Server

This dedicated server is tailored for websites with high database loads and excessive hits. It is located in a secure Australian Data Centre with 24 hour monitoring a day. With fully redundant configurations, the data centre enables us to deliver a maximum uptime and performance to our clients.

COST	
Set-up fee	\$199 AUD (once-off)
Monthly Payment	\$379 AUD / month
System Specifications	
Processor	Intel Core 2 DUO E6300 2 x 1.8 Ghz
Memory	1024MB DDR2
Disk Space	160GB
IP Addresses	3
Data Transfer per month	150GB
Operating Systems	RedHat Enterprise Linux <small>Redhat Enterprise Linux is a commercial version of Linux which is certified and supported by vendor. With other providers, you will normally get charged extra \$75 / month but we make it available without additional charges</small>
Firewall and basic server security (Optional)	Included for FREE
Support	
24x7 Network monitoring	Yes
99.9% Uptime guarantee	Yes
Hardware replacements	Yes
Add-ons	
Prepaid Bandwidth	\$12 / 10GB
Data Transfer Excess	\$5.50 / GB
Server Management	\$149 AUD / month
Control Panel (Ensim 20 domains)	\$40 / month
Control Panel (Ensim 250 domains)	\$80 / month
3 x IP address	\$16.50 / month
6 x IP address	\$33 / month
9 x IP address	\$49.50 / month
12 x IP address	\$66 / month
15 x IP address	\$82.50 / month
18 x IP address	\$99 / month
21 x IP address	\$115.50 / month
24 x IP address	\$132 / month
27 x IP address	\$148.50 / month

Memory Upgrades	
Memory upgrade (DDR2) from 512 MB – 1.5 GB	\$25 / month
Memory upgrade (DDR2) from 512 MB – 2 GB	\$50 / month
RAID	
Disk Mirroring (RAID 1)	FREE*
Hard Drive Upgrades	
160GB – 250GB	\$12 / month
160GB – 320GB	\$24 / month
160GB – 400GB	\$48 / month
160GB – 500GB	\$96 / month
Additional Hard Drive	
160GB	\$36 / month
250GB	\$48 / month
320GB	\$60 / month
400GB	\$84 / month
500GB	\$120 / month

- * Data transfer applies to both inbound and outbound data
- * Minimum of 3 months contract
- * Upgrade performed after initial setup will incur \$50 set-up fee.
- * For RAID, you need to order additional hard drive with the same capacity as primary hard drive

Additional Information:

Control Panel

Our user friendly control panel gives you complete, real time control of the administration of your website. You can add, edit, and delete mailboxes, e-mail aliases, set up mail forwarding, manage auto responders, create secure directories, change your password, view statistics, send and receive web based e-mail, administer your database, etc.

For more information and demo of our control panel, please go to this link:
<http://www.dotexcel.com.au/helpdesk/ensim.php>

The installation of our control panel will also install software packages that enable the following features on the server:

Web Server	
Apache Web Server	
Email Features	
Pop Accounts	Catch All Email
Webmail Access	Mailing List
Email Aliases	Virus Filtering
Email Auto Responders	SPAM Filtering
Management	
FTP Accounts	Traffic Stats
Online File Manager	Raw Log Files
Control Panel	
Domain Features	
No WWW protocol	Sub domains
Domain Pointers	Domain Forwarding
Extra Features	
Password Protected Directories	FrontPage Support
SSH	Daily Backups
Databases and Software	
HTML	SSI
Java Script	MySQL Database
PHP 4.3.9	PHPmyAdmin
Perl 5	Streaming media
Private CGI bin	

If you do not purchase Control Panel Add-ons, your server will only have Redhat Enterprise Linux installed without any features above. Customer will have to install those features to obtain the services.

Server Management (\$149/mth)

While control panel let you easily administer your website, our server management will ensure that server is always secure, healthy and updated with latest patches. Our server management covers the following tasks:

- Secure server from common exploits and vulnerabilities
- Latest security and application updates
- Setup of private name servers and host name
- Installation and configuration of firewall
- Operating system and application updates
- Proactive security updates
- 24x7 monitoring and support
- Data backup and restore (must have control panel above)
- Troubleshooting and resolving server technical issues and software installations
- 5 hours of system administration time per month
- Daily log audit
